Year of the Earth Pig - 5 Feb 2019

Dear Friends,

Wave goodbye to the Year of the Dog and welcome the Earth Pig; full of fun, mischief and discovery.

The pig brings an energy of naive, childlike play; laughter is very important as is being with like-minded people. The pig loves to roll around and snuffle things out. Hunting in the dirt for the gems to eat. So is its energy - creating a desire to hunt for what you need, to find your flow and be with those people who see the true you.

It is a year to see past the exterior to the real heart of someone or something. This year will bring revelations, deep understanding and even some mysteries unfolded. This year is also about the Earth and your connection to it. Be grounded, planted here in this world rather than with your head in clouds. Let the Pig show you how to embrace the land, and feel the warmth and nurture of Mother Earth.

However, Pigs can also be volatile and very protective of what is theirs. Watch for jealousy and envy in yourself and in others. This will be the dark side of Pigs energy though it will also offer you a chance to change and see some of your own shadow self. Being protective of what is yours can get out of balance and be overbearing or dictatorial, be self-aware and keep an eye on your behaviour.

Lastly, Pig teaches you to get your hands dirty. Get in the mud and use your hands. Rather than relying on others look to your own inner strength and resolve. Pigs are very capable, as are you.

Be joyful this year and be productive.

Blessings

Chou
